

## PROCURE-OUT

### Professional E-Procurement Outsourcing

#### An innovation of C.E.N.T.! Project Management

With **PROCURE-OUT**, C.E.N.T.! Project Management expands its performance suite. On the basis of a Service Level Agreement, we take on full responsibility for the implementation, care and maintenance of the E-Procurement solution as well as the downstream purchasing process. The purchase of non-strategic goods and services simply does not belong in the core tasks of many firms.

Professional E-Procurement solutions for purchasing have become increasingly important due to their optimization of material and process expense. Here, cost reduction, process down-sizing and transparency become the centre of attention!

Even the application of an E-Procurement solution can tie up unnecessary resources in a firm because the success of such a solution essentially depends on competent administration and maintenance. Also, a large part of the purchasing mix consists of static product lines which, although always needed, do not constitute part of a firm's strategic purchases.

With **PROCURE-OUT**, C.E.N.T.! Project Management offers firms their own purchasing platform. The combination of providing an E-Procurement solution and the concurrent reproduction of a purchasing system for non-strategic goods frees up a firm's resources – and expenses become calculable and plannable!

Very often firms recognize the advantages of using such a system but are reticent about introducing one. Restricted budgets, limited resources and an important missing element, cost-use-transparency, are usually given as the reasons.

**PROCURE-OUT** offers its clients the advantage of immediate need-based use of an E-Procurement solution. It frees up the client's resources and increases their efficiency.

In addition, cost optimization in purchasing, along with a concurrent increase in cost transparency, can make a major contribution to a client's competitiveness.

The client firm totally concentrates on its strategic tasks – the rest is taken on by C.E.N.T.! Project management.

**PROCURE-OUT** is a service of C.E.N.T.! Project Management.
